Tarzan

A medium late starch variety with high to very high starch yields, characterized by high tuber numbers and uniform tubers. Despite the maturity group, Tarzan has a rapid and steady youth development. Strong against second growth. Suitable for bulk storage due to low susceptibility for fusarium. Resistances against PCN Ro 1, 3, 5 and PVY are to be highlighted. Also resistant to potato wart disease 1.[nbsp][nbsp]

Plant

Maturity	Medium late
Plant type	Intermediate
Growth habit	Semi-upright
Color of flower	White
Foliage development	Rapid
Number of tubers	High
Dormancy	High

Tuber characteristics

Tuber shape	Round, Round oval
Flesh color	Light yellow
Eye depth	Medium
Skin color	Yellow
Skin characteristic	Netted

Resistances

Nematodes	Ro 1, Ro 3, Ro 5
Potato wart disease	Race 1
Leaf blight	Medium
Tuber blight	Medium
Rhizoctonia	High
Black leg	High
Common scab	High
Internal rust spot	High
Second growth	High
Damages	Medium
Bruising	Low, Medium
PVY	Very high

Yield and Quality

Market outlet	Starch
Yield	Very high
Share oversize	Medium
Share undersize	Low
Dry matter content	High
Dry matter yield	Very high
